\*\*130 bottles in champagne + "traditional Bordeaux"

Every detail,  
*carefully crafted.*

## Quality

Every detail is a testament to EuroCave Professional's excellence.

### **Durable, high-quality materials**

Structure of cabinet body in reinforced metal, shelf in beech wood, very hard-wearing, internal walls in aluminium.

### **A controlled environment**

Electronic control to maintain the required temperature to the nearest 10<sup>th</sup> of a degree, compressor placed on

"silent blocks" to prevent vibration, polyurethane foam insulant injected into the cabinet body structure in order to ensure a constant temperature.

Peace of  
*mind*

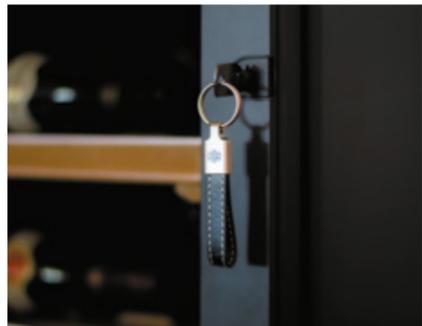

## A relationship of trust & support

Made in France.

Local support with a network of experts in France and abroad.

All EuroCave Professional products have an individual identification number which allows their origin and authenticity to be established.

Access to the contents of your wine cabinet is secured via a lock.

Several visual alarm systems also protect your wine every day: humidity, temperature fault, charcoal filter and temperature sensor fault.
